INTERN JAVA

PROFILE

I am Java Backend Developer with a solid foundation in Java and backend technologies. Familiar with Spring Boot, Hibernate, and RESTful APIs. Eager to learn and contribute to building efficient and reliable applications.

WORK EXPERIENCE

- Personal Project : Job Search Project** 12/2024 - 3/2025
- Project summary:** Building a job search backend application
 - Project tasks involved:** Spring Boot, Spring Data JPA, Spring Security, MySQL, Custom Validator implementation, and JWT-based authorization.
 - Position:** Back-end developer
 - Responsibility:**
 - Developed custom validation annotations for input data.
 - Implemented role-based access control by adding roles and permissions to JWT.
 - Configured Spring Security with JWT for authorization and enhanced security.
 - Created exception handling mechanisms with appropriate HTTP codes for better error response.
 - Utilized Lombok and MapStruct to optimize code structure and enhance pagination handling.
 - Wrote unit tests for key methods across various classes to ensure code quality and reliability.
 - Began integration testing to validate interactions between components and overall system behavior.
 - Integrated OAuth2 login with Google for user authentication and seamless sign-in experience.
 - Github Backend:** [here](#)
 - Github Frontend:** [here](#)
